

MIECHV Benchmarks 2016

Performance Measure	Numerator	Denominator
1. Preterm Birth: Percent of infants (among prenatally enrolled women who enrolled before 37 weeks) who are born preterm following program enrollment.	# of live births (index child or subsequent children among mothers who enrolled in home visiting prenatally before 37 weeks) born before 37 completed weeks of gestation and after enrollment	# of live births after enrollment who were born to mothers enrolled in home visiting prenatally before 37 weeks
2. Breastfeeding: Percent of infants (among mothers who enrolled in home visiting prenatally) who were breastfed any amount at 6 months of age	# of infants aged 6-12 months (index child among mothers who enrolled in home visiting prenatally) who were breastfed any amount at 6 months of age	# of infants aged 6-12 months (index child among mothers who enrolled in home visiting prenatally) enrolled in home visiting for at least 6 months
3. Depression Screening: Percent of primary caregivers enrolled in home visiting who are screened for depression using a validated tool within 3 months of enrollment (for those not enrolled prenatally) or within 3 months of delivery (for those enrolled prenatally)	For those not enrolled prenatally, number of primary caregivers enrolled in home visiting who are screened for depression within the first 3 months since enrollment; for those enrolled prenatally, the number of primary caregivers screened for depression within 3 months of delivery	For those not enrolled prenatally, the number of primary caregivers enrolled in home visiting for at least 3 months; for those enrolled prenatally, the number of primary caregivers enrolled in home visiting for at least three months post delivery
4. Well Child Visits: Percent of children enrolled in home visiting who received the last recommended visit based on the American Academy of Pediatrics (AAP) schedule	# of children (index child) enrolled in home visiting who received the last recommended well child visit based on the AAP schedule.	# of children (index child) enrolled in home visiting
5. Postpartum Care: Percent of mothers enrolled in home visiting prenatally or within 30 days after delivery who received a postpartum visit with a healthcare provider within 8 weeks (56 days) of delivery	# of mothers enrolled in home visiting prenatally or within 30 days after delivery who received a postpartum visit with a healthcare provider within 8 weeks (56 days) of delivery	# of mothers who enrolled in home visiting prenatally or within 30 days after delivery and remained enrolled for at least 8 weeks (56 days) after delivery

<p>6. Tobacco Cessation Referral: Percent of primary caregivers enrolled in home visiting who reported using tobacco or cigarettes at enrollment and were referred to tobacco cessation counseling or services within 3 months of enrollment.</p>	<p># of primary caregivers enrolled in home visiting who reported using tobacco or cigarettes at enrollment and were referred to tobacco cessation counseling or services within 3 months of enrollment</p>	<p># of primary caregivers enrolled in home visiting who reported using tobacco or cigarettes at enrollment and were enrolled for at least 3 months</p>
<p>7. Safe Sleep: Percent of infants enrolled in home visiting that are always placed to sleep on their backs, without bed-sharing or soft bedding</p>	<p># of infants (index child aged less than 1 year) enrolled in home visiting whose primary caregiver reports that they are always placed to sleep on their backs, without bed-sharing or soft bedding</p>	<p># of infants (index child) enrolled in home visiting who were aged less than 1 year during the reporting period</p>
<p>8. Child Injury: Rate of injury-related visits to the Emergency Department (ED) since enrollment among children enrolled in home visiting.</p>	<p># of parent-reported nonfatal injury-related visits to the ED since enrollment among children (index child) enrolled in home visiting</p>	<p># of children (index child) enrolled in home visiting</p>
<p>9. Child Maltreatment: Percent of children enrolled in home visiting with at least 1 investigated case of maltreatment following enrollment within the reporting period.</p>	<p># of children (index child) enrolled in home visiting with at least 1 investigated case of maltreatment since enrollment</p>	<p># of children (index child) enrolled in home visiting</p>
<p>10. Parent-Child Interaction: Percent of primary caregivers enrolled in home visiting who receive an observation of caregiver-child interaction by the home visitor using a validated tool.</p>	<p># of primary caregivers enrolled in home visiting who receive an observation of caregiver-child interaction by the home visitor using a validated tool</p>	<p># of primary caregivers enrolled in home visiting with children <u>reaching the target age range</u></p>
<p>11. Early Language and Literacy: Percent of children enrolled in home visiting with a family member who reported that during a typical week s/he read, told stories, and/or sang songs with their child daily, every day.</p>	<p># of children (index child) enrolled in home visiting with a family member who reported that during a typical week s/he read, told stories, and/or sang songs with their child daily, every day</p>	<p># of children (index child) enrolled in home visiting</p>

<p>12. Developmental Screening: Percent of children enrolled in home visiting with a timely screen for developmental delays using a validated parent-completed tool.</p>	<p># of children (index child) enrolled in home visiting with at least one screening within the AAP-defined age groups during the reporting period</p>	<p># of children (index child) enrolled in home visiting <u>reaching the specified time frame</u> during the reporting period</p>
<p>13. Behavioral Concerns: Percent of home visits where primary caregivers were asked if they have any concerns regarding their child’s development, behavior, or learning.</p>	<p># of home visits where primary caregivers enrolled in home visiting were asked if they have any concerns regarding their child’s development, behavior, or learning</p>	<p>Total number of home visits during the reporting period</p>
<p>14. Intimate Partner Violence Screening: Percent of primary caregivers enrolled in home visiting who are screened for interpersonal violence (IPV) within 6 months of enrollment using a validated tool.</p>	<p># of primary caregivers enrolled in home visiting who are screened for IPV using a validated tool within 6 months of enrollment</p>	<p># of primary caregivers enrolled in home visiting for at least 6 months</p>
<p>15. Primary Caregiver Education: Percent of primary caregivers who enrolled in home visiting without a high school degree or equivalent who subsequently enrolled in, maintained continuous enrollment in, or completed high school or equivalent during their participation in home visiting.</p>	<p># of primary caregivers who enrolled in, maintained continuous enrollment in, or completed a high school degree or equivalent after enrollment in home visiting (and met the conditions specified in the denominator)</p>	<p># of primary caregivers without a high school degree or equivalent at enrollment</p>
<p>16. Continuity of Insurance Coverage: Percent of primary caregivers enrolled in home visiting who had continuous health insurance coverage for at least 6 consecutive months.</p>	<p># of primary caregivers enrolled in home visiting who reported having health insurance coverage for at least 6 consecutive months since enrollment in home visiting</p>	<p># of primary caregivers enrolled in home visiting for at least 6 months</p>
<p>17. Completed Depression Referrals: Percent of primary caregivers referred to services for a positive screen for depression who receive one or more service contacts.</p>	<p># of primary caregivers enrolled in home visiting who received recommended services for depression (and met the conditions specified in the denominator)</p>	<p># of primary caregivers enrolled in home visiting who had a positive screen for depression within 3 months of enrollment and were referred for services</p>

<p>18. Completed Developmental Referrals: Percent of children enrolled in home visiting with positive screens for developmental delays (measured using a validated tool) who receive services in a timely manner.</p> <ul style="list-style-type: none"> a. received individualized developmental support from a home visitor; b. were referred to early intervention services and received an evaluation/individualized service plan within 45 days; OR c. were referred to other community services and received services within 30 days. 	<p># of children enrolled in home visiting who</p> <ul style="list-style-type: none"> a. received individualized developmental support from a home visitor; b. were referred to early intervention services and receive an evaluation within 45 days; OR c. were referred to other community services who received services within 30 days (and met the conditions specified in the denominator) 	<p># of children enrolled in home visiting with positive screens for developmental delays (measured using a validated tool)</p>
<p>19. Intimate Partner Violence Referrals: Percent of primary caregivers enrolled in home visiting with positive screens for IPV (measured using a validated tool) who receive referral information to IPV resources.</p>	<p># of primary caregivers enrolled in home visiting who received referral information to IPV resources (and met the conditions specified in the denominator)</p>	<p># of primary caregivers enrolled in home visiting with positive screens for IPV (measured using a validated tool)</p>
