

# Diaper Changing Steps

1 Wash and dry hands or use hand sanitizer.

2 Set up a place to change baby and gather supplies – clean diaper, wet wipes or warm washcloth, a burp cloth or washcloth, and a changing pad.

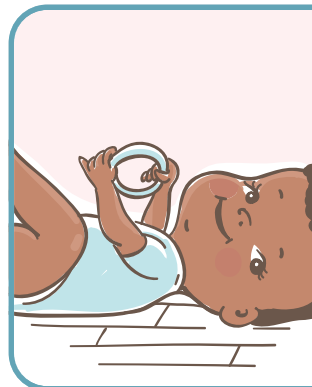

3 Keep a hand on baby at all times or use changing table straps to make sure baby doesn't fall.

4 Open a clean diaper and put it under the baby. Remove the dirty diaper. For a boy, cover his penis with a clean cloth to avoid accidents.

5 Fold the dirty diaper under the baby, clean side up. Clean the area from front to back with a wipe or washcloth. Remove the dirty diaper. Fasten the clean diaper securely.

6 Dress your baby and put her in a safe place, such as on the floor or in her crib.

7 Dispose of soiled items and clean the changing table.

8 Wash and dry hands or use hand sanitizer.
